ABOUT ME

I'm a BSc(Hons) Digital Media L3 student at UWE looking for a job opportunity related with visual design, user experience or web development.

EDUCATION & QUALIFICATIONS

Digital Media at The University of the West of England

`2015 - Present`

Modules: Graphic Design, Web Design, User Experience, Multimedia Studio, 3D Technologies for the Web, Data Schemas and Applications.

Visual Arts at Amora's Secondary School, Portugal

`2009 - 2012`

Modules: Drawing, Culture and Art History, Materials and Technologies, Foreign Language (English) **EQF Level 4**

TECHNICAL SKILLS

Git, HTML, CSS, Javascript, PHP and mySQL. I've worked with frameworks, CMS' and libraries such as React, GSAP, and Wordpress.

CREATIVE SKILLS

Adobe Suite, including Illustrator, Photoshop, After Effects, Premiere and Animate. Prototyping, sketching, critical thinking.

ACHIEVEMENTS

Part of research project team in Hong Kong, to study design improvements for public transportation. (2016)

Awarded best design for Golfinho Parade project. (2011)

Developing open source projects. (see GitHub)

Creating a group dedicated to get people together to play music. (Bristol Jams)

WORK EXPERIENCE

codeWest, Product Manager

`09/2018 - Present`

Overseeing the development and delivery of and educational platform focused on STEM and maritime life topics.

Establishing communication between the team and the client.

Investigating approaches to implementation. Front-end and back-end development.

Simpleweb, Developer

`07/2017 - 07/2018`

Development of robust SaaS mobile and web applications, adhering to the SCRUM framework.

Technologies used included React Native, Node, php to develop and maintain applications.

Being flexible in my role opened the opportunity to create UI designs and touch other areas of development such as deployment of both websites and mobile apps.

Lucile Pingaud, Developer

`06/2016 - 09/2016`

Designed and developed website for camera operator and filmmaker Lucile Pingaud, as a freelance web designer.

Considering design and user experience aspects, I have used my coding skills to work on front end and back end development, implementing a CMS and deployment into a server.

This resulted in a portfolio website the client can add content without the need of a developer.

References given upon request.
